

Ethernet private line between two IntraLATA locations. Up to 100Gbps.

In today's digital landscape, continuous network connectivity is a key differentiator in keeping your business running. AT&T Business Connect plans make staying connected easy.

Meet Your Network Needs

AT&T Dedicated Ethernet can assist you with its high-speed fiber-based, point-to-point solution that connects your data service within the same local access and transport area (intraLATA) and transmits data at speeds up to 100 Gbps as either native Ethernet or Optical Transport Network (OTN) formats. AT&T Dedicated Ethernet is delivered over an expansive Dense Wave Division Multiplexed (DWDM) / Reconfigurable Optical Add-Drop

Multiplexer (ROADM) network to help ensure high performance and function.

An Ethernet Arrangement for You

If your business has heavy bandwidth between two locations, like Data Center to Data Center File transfers or two large sites (Sales Distribution Center to Accounting), you may require a high bandwidth, reliable, highly secure and cost effective point-to-point link at:

- 1 Gigabit per second
- 2.5 Gigabits per second
- 10 Gigabits per second
- 40 Gigabits per second
- 100 Gigabits per second

Potential benefits

- Performance
 - Cost effective data transport with minimal upfront investment
 - private line optical service with low latency and jitter, critical to server synchronization and other delay-sensitive network applications
 - 24/7 monitoring
- Agility
 - Flexible connectivity and redundancy options
- Control
 - Service Level Agreements for fully protected or unprotected.
- Security
 - Comprehensive Cybersecurity portfolios; robust security measures in place

Features

- Diversity
 - Options include Port, Interwire Center and Alternate Wire Center (AWC) diversity.
- Port Protection Plus
 - Service includes protected ports, inter-office facilities plus dual card protection. Two transport paths are provided with automatic failover if one fails.
