

# Secure and reliable remote connectivity.

## Collaborate on the go

More connectivity, more devices, more locations. That's what today's telecommuting workforce demands. Keeping on-site and remote workers connected and productive means finding a way to integrate devices, applications and services within the same network, securely and reliably.

AT&T Network-Based IP VPN Remote Access Services (ANIRA) provides highly secure access to critical business applications—regardless of access type, device or location. ANIRA offers the reliability and flexibility that only the unified AT&T Global Network can deliver.

## Simplicity and consistency

Decentralize your workforce. Improve efficiencies using one connectivity solution. You'll gain peace of mind that your employees at home, on the go or in a satellite office have consistent access to applications and data.

## Unmatched business continuity

ANIRA equips you to meet the demands of an ever-changing business climate while helping you accelerate productivity. Scale with ease, ensure enhanced network performance and provide your workforce with a high-definition experience they can trust.

## Potential benefits

- Breadth of Access and Extended Global reach
